

INFINITY KNIGHTS

MISSION OPS

Mission Ops transforms traditional learning environments into interactive STEAM Labs. Students become Agents in an **Infinity Knight's Command Center** where they apply their knowledge to guide operatives through challenging missions.

Hands-on Projects

Mission Ops emphasizes **physical, hands-on, kinesthetic learning**. Our missions task students with setting up models, running experiments, and getting their hands dirty. Our enabling technology takes a back seat to power project-based learning.

High Stakes Adventures

Classes of **up to 30+ students** divide into **small teams and work together** to solve problems to support Infinity Knight operatives on missions to preserve peace and justice throughout the universe. **Everything depends on the students!**

Flexible Deployment

Mission Ops delivers a high-impact learning experience with **maximum flexibility**. A *Mission Ops* Command Center can be set up in **any classroom or lab**—you just need a projector or TV and a handful of iPads. We take care of the rest.

Selection Criteria

Your school may be eligible for the *Mission Ops* experience if:

- You have (or plan to build) an engaging STEAM Lab.
- You have STEAM curriculum in place (or under development) that we can adapt into an interactive adventure.
- You employ forward-thinking staff who like trying new technologies and tools.
- You are passionate about out-of-the box ideas.
- You are willing to install thematic decorations in your STEAM Lab (e.g. lights, sound system).
- You are a proactive and collaborative partner.
- You can rally support at the superintendent, principal, and instructor levels.
